DETAILED ACTION

Election/Restrictions

Claim 10 links the species of the instant invention. Upon the allowance of the linking claim(s), the species election requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 11-12, 17, 25 and 27, drawn to a method of treating fibromyalgia, classified in class 514, subclass 740.
- II. Claims 2-3, 13-16, 18-19 and 26, drawn to a method of treating a disorder such as a sleep disorder, classified in class 514, subclass 762.
- III. Claims 4 and 20, drawn to a method of increasing secretion of human growth hormone, classified in class 514, subclass 724.

- IV. Claims 5 and 21, drawn to a method of treating irritable bowel syndrome, classified in class 514, subclass 567.
- V. Claims 6-9 and 22-24, drawn to a method of treating a disorder such as agoraphobia, classified in class 514, subclass 740.

Inventions I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not capable of use together, have different modes of operation, different functions and different effects because they are all directed to the treatment of different indications which includes different patient populations and drug dosages.

A telephone call was made to Karen DeBenedictis on 1 February 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
